

## EARLY YEARS TILT & TOUCH TABLE

### Early Years Tilt and Touch Interactive Table

**SIZES AVAILABLE : 32" & 42"**

The Early Years Tilt & Touch is a great addition to any nursery or Key Stage 1 classroom with the objective of engaging preschoolers using educational gaming software to inspire learning. The robust aluminium table frame, painted using anti-bacterial paint, includes a built-in PC, meaning teachers are simply one touch away from transforming the classroom into a collaborative learning environment.

Teachers can use it as a table format by moving it into a horizontal position, allowing more preschoolers to interact together around the table. Alternatively, the table can be tilted through 75 degrees before being locked in place to enable preschoolers to use it more comfortably sitting down or if they playing on their own.

#### Painted with Anti-Bacterial Paint

Available to purchase in a number of colours all of which are made from anti-bacterial paint, therefore they won't harbour germs and will be easily cleaned.

#### Tilting and Lockable Screen

The G-Touch Tables can be tilted through 75 degrees before being locked in place. Making both viewing and touch more comfortable for children using it.

#### Built-In PC

A fully built-in PC is included on all G-Touch Tables. Saving you having to connect to external computer devices for uploading and displaying content.

#### Lockable Safety Wheels

Lockable wheels support easy and safe use within the classroom environment and allow multiple users to work safely on any G-Touch Table at the same time.

#### E-Safety Built-In

The teacher has full control over the content that the child is able to access. They can create black and white lists for all browsing as well as being able to create pin access so that a child does not find themselves in an area they shouldn't be.

Tailored for Early Years; Nursery, Key Stage 1 or 2. Teaching through game led learning and team work.

Available in these colours and materials. (For representation purposes only)
